SHADOWGRID — THE AI LANDMAN

Plug a $60M NVIDIA DSX Pod into existing building power in 14 days.

1.5 MW

Existing CPS building breaker

12 rear parking spots ($7,500/mo NNN)

$250K

Power & 288F fiber plug

Paid by customer deposit or JV partner

504 GPUs

7x Vera Rubin NVL72 racks

25.2 ExaFLOPS inside one 40-ft box

New AI data centers wait 48 months for grid power. NVIDIA DSX Pods turn on in 14 days.

48 Mos

ERCOT & CPS substation queue

For any new greenfield data center

6+ Mos

Traditional site construction

600,000 labor hours & water permits

14 Days

NVIDIA DSX Pod bring-up

Ships pre-built & tested from factory

We tie up the 1.5 MW breaker and offtake contract. The DSX Pod rolls off two trucks.

$0 down

1. Lock 90-day pad option

$7,500/mo rent starts when pod turns on

$250K

2. Run wire & fiber to lot

480V feeder + sub-meter + crane mats

$60M

3. Drop DSX Pod + Chiller Skid

White compute box + Brown cooling skid

Connecting behind the building's existing CPS meter bypasses the 4-year queue.

30 Days

Green CPS transformer on site

2,000A–3,000A (480V) already active

0%

Legal CPS sub-meter pass-through

1:1 power billing + flat pad rent
