SHADOWGRID — PARTNER ALIGNMENT PLAN (ASD-STE100)

> **Core Thesis:** Big AI data centers wait **48 months** for utility power. NVIDIA's `Vera Rubin NVL72` **DSX Pod** ships pre-built and turns on in **14 days** at a prepared `1.5 MW` site.
> **ShadowGrid is the "AI Landman."** We option `1.5 MW+` (`480V`) building breakers and 12 rear parking spaces across San Antonio for `$7,500/mo` **NNN**, install the `$250,000` site plug, and pair each site with a 3-to-5 year Gov/Enterprise Offtake Contract.

1. THE 4 DEAL COMPONENTS

Component	Specification	Owner	Upfront Cost
1. Land & Power (`1.5 MW`)	12 parking spaces + existing `2,000A–3,000A` (`480V`) breaker behind the CPS meter (`$7,500/mo` NNN; rent starts at turn-on).	**ShadowGrid** *(90-Day Option)*	`$0` **Down**
2. Prepared Site Plug	Armored `480V` feeder + sub-meter + `288F` fiber conduit + precast crane mats on existing asphalt.	**Electrical Contractor**	`$250,000` *(Deposit/Fund)*
3. Compute Pod (`$60M`)	`40-ft` **NVIDIA DSX Pod** (`7x Vera Rubin NVL72` = `504` GPUs / `25.2 EFLOPS`) + matched dry-cooler/power skid.	**NVIDIA Partner / Infra Fund**	`$0` *(Unless Option C)*
4. Offtake Contract	3-to-5 year Gov/Enterprise contract buying compute (`$9.50–$12.25/GPU–hr`) or leasing the pad (`$225–$383/kW/mo`).	**ShadowGrid Offtake Lead**	`$0`

2. THE 3 MONETIZATION MODELS (SITE #1 PARTNER VOTE)

Model	Mechanics	Capital Raised	ShadowGrid Net / Yr	Tradeoff
Option A: Pad Sublease	Customer brings `$60M` pod. Customer 1-mo deposit (`$337.5k+`) pays `$250k` wire.	`$0`	`$3.9M–$6.7M / yr` (*`$225–$383/kW/mo`*)	Fastest turn-on (`45d`), zero debt.
Option B: "AI Landman" JV *(Recommended)*	We bring `$7.5k/mo` site option + `$39.4M/yr` Offtake LOI. Infra fund puts up `$60.25M` (`19–mo` payback).	`$0`	`$5.9M–$7.8M / yr` *(Royalty)* or `$11.3M–$18.9M` *(Carry)*	Requires signed Offtake LOI to fund.
Option C: Own `$60M` Pod	Finance `$60M` pod with `75%` debt (`$45M`) + `25%` equity (`$15.25M`).	`$60.25M`	`$37.8M / yr` **EBITDA** (*`$20.2M`* *net after debt)*	Takes 3–6 mos to underwrite debt/equity.

3. PHYSICAL, UTILITY & TAX RULES (ZERO PERMITS NEEDED)

- **Zero Utility Queue (30 Days vs. 48 Months):** We target buildings with an active green CPS transformer outside and a `2,000A–3,000A` (`480V`) breaker inside. We connect behind the existing meter.
- **Zero Natural Gas / Zero Air Permits:** We use existing CPS grid power (`6.5¢/kWh`). No natural gas generators = zero TCEQ air permits or Fire Marshal fuel permits.
- **100% Legal CPS Sub-Metering (`0%` Markup):** We install an ANSI C12.20 sub-meter and pass the exact `~$850k/yr` CPS power bill through `1:1` at `0%` markup (`$0` cost to us).
- **100% Building Power Priority (`NVIDIA MaxLPS`):** Current sensor on the building main breaker throttles the pod in `<10 ms` if building load rises. Building keeps 100% priority.
- **Zero Excavation / Zero Water:** `31–ton` container and closed-loop dry cooler sit on precast crane mats on existing asphalt.

- **100% Year-1 Tax Write-Off (`IRC § 168(k)`):** Because the pod and skid remain 48-hour removable equipment (not permanent real estate), the capital partner deducts **100% of the `$60M` cost in Year 1** (`~$12.6M` cash tax shield).

4. ACTION ITEMS THIS WEEK

Confidential 149-Site Map (Separate Link): https://shinertx.github.io/sa-power-map/

Action	Deliverable	Verification Standard	Owner
1. Broker Distribution	Pitch top San Antonio industrial/flex brokers (`$25k` fee/site; `$7.5k/mo` NNN adds `+$1.4M` to building value).	Lock initial 5–10 building walkthroughs.	**Al (Partnerships)**
2. 3-Photo Ops Gate	Collect 3 photos per site: (1) Outdoor CPS transformer `kVA` tag, (2) Indoor `480V` breaker tag, (3) August CPS bill.	Confirm `1.5 MW+` spare power + written `$250k` quote.	**Neal (Ops)**
3. Option / License	Short-form 90-Day Option & 5-Year NNN License under `Bexar Commercial Utility Easements LLC`.	Cover `$0` option rent, `0%` sub-meter, `§168(k)` waiver.	**Dub (Legal)**
4. Offtake & Capital	Confirm binding 3-to-5 yr Offtake LOI (`$9.50–$12.25/GPU-hr`) and Option B infra-fund term sheet for Site #1.	Fund `$250k` site plug and `$60M` pod order.	**Ben / Offtake Lead**
